

To sign up for Drew County weather alerts visit the following link: <http://hyper-reach.com/ardrewsignup.html>

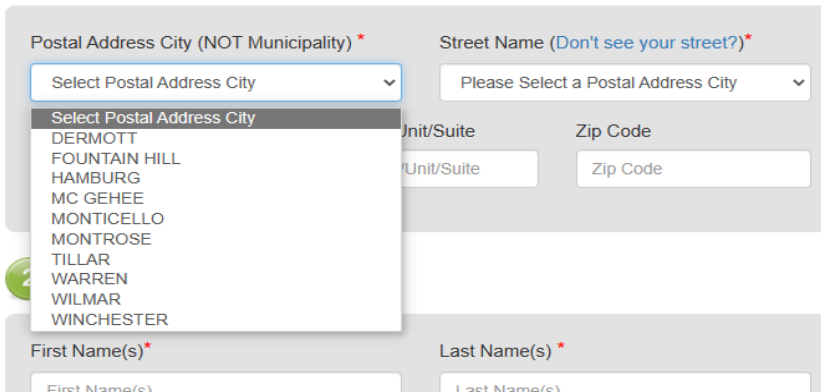

Or scan this QR Code: and follow the steps.

A few tips:

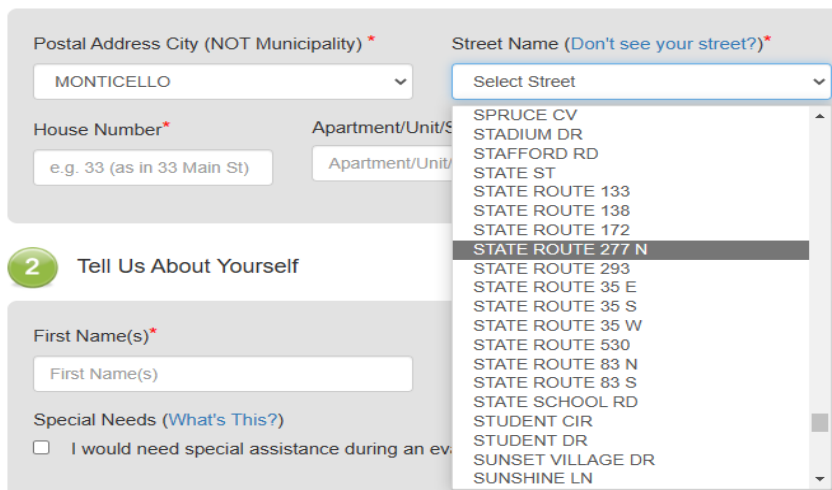

When signing up be sure you pick the city associated with your Zip Code. For example, you might live on Hwy 278 E, but many on that Hwy have a Dermott Zip Code.

1 Let's find your address

When selecting the road/highway you live on, the list will be in Alphabetical order. If you expect to find your road on the list and don't see it keep looking. Some of the roads are labeled different than we say them. For example, if you live on Hwy 277 N it is labeled below as "State Route 277 N". Another example of this would be Hwy 425 or 278 listed as "US Highway 425 N".

1 Let's find your address

Its important to get your address right because storm alerts are based on your geographical location. If there is a tornado warning, Hyper Reach will automatically send out a message to people in the area that is under the warning (if you have signed up for alerts.)

When signing up you can add one phone number or multiple. You can choose whether you get alerts by text messages, phone calls, or both. And you can choose the type of storms you want an alert for. (See example below)

Be sure to have "Weather Alerts" checked to "On" (See example below)

3 Tell Us How To Reach You \*

Choose voice, text or email, then tell us the number or email address to use. Lastly, tell us if you want Weather Alerts.

Please be sure to include contact info for all members of your household below.

Type	Phone Number / Email	Community Alerts	Weather Alerts <a href="#">More Info</a>
Cellul <input type="text"/>	Phone Num <input type="text"/>	Text Msg Only <input type="text"/>	<input checked="" type="checkbox"/> On <a href="#">Weather Settings</a>
